

Sheikh Khalifa Medical City - Ajman Fellowship Program for Emirati Physicians

I. Objectives and scopes

SKMCA offers specialized fellowship training program for physicians who have completed a recognized residency-training program. In line with the vision and mission of SKMCA, this program is focused on several subspecialties such as Diabetes, Orthopedics, Gastroenterology and Feto-maternal medicine.

To pursue clinical excellence for Emiratization, the program will:

1. Provide the candidate with world leading specialized practice within a chosen clinical field. The programs can be tailored individually to produce the expected learning outcomes
2. Enhance the clinical expertise in SKMCA; and
3. Increase the clinical capacity and expertise between SKMCA and the local community

Additionally, the international fellowship program includes focused clinical practice in a goal-oriented approach that is underpinned by:

1. Supervision from an expert clinical preceptor;
2. Clinical observership
3. Clinical conference attendance; and
4. Clinical mentoring

II. Eligibility

Pre-requisite for applicants includes:

- UAE National medical doctors who has finished a recognized residency training program
- The applicants should be employed under any governmental healthcare facility in UAE
- Ability to speak the Swedish language, in order to communicate with Swedish patients (Swedish language lessons will be provided as part of the fellowship program)
- Eagerness to learn from the Swedish healthcare system.
- Fellowship application to be approved by the Swedish health authorities
- Candidates will sign an undertaking to work at Sheikh Khalifa Medical City – Ajman for a period equivalent to the length of the training plus two years.

III. Current Specialties open for applications
