

Sheikh Khalifa Medical City - Ajman Residency Program for Emirati Physicians

I. Objectives and scope

SKMCA offers residency training programs for physicians who completed their medical degree and the internship requirements. In-line with the vision and mission of SKMCA, this program is focused on several subspecialties such as Diabetes, Orthopedics, Gastroenterology and Feto-maternal medicine.

To pursue clinical excellence for Emiratization, the program will:

1. Provide the candidate with world leading specialized practice within a chosen clinical field. The programs can be tailored individually to produce the expected learning outcomes
2. Enhance the clinical expertise in SKMCA; and
3. Increase the clinical capacity and expertise between SKMCA and the local community

Additionally, the international residency program includes focused clinical practice in a goal-oriented approach that is underpinned by:

1. Supervision from an expert clinical preceptor;
2. Clinical observership
3. Clinical conference attendance; and
4. Clinical mentoring

II. Eligibility

Pre-requisite for applicants includes:

- UAE National medical doctors who completed their Internship, to be approved by Swedish health authorities.
- Candidates should not have been out of clinical practice for more than 12 months at any point.
- Ability to speak the Swedish language, in order to communicate with Swedish patients (Swedish language lessons will be provided as part of the residency program)
- Eagerness to learn from the Swedish healthcare system.
- Residency application to be approved by the Swedish health authorities
- Candidates will sign an undertaking to work at Sheikh Khalifa Medical City – Ajman for a period equivalent to the length of the training plus two years.

III. Current specialties open for applications

Currently, residency seats are available in the following specialties through

- Anesthesiology and intensive care
- Rheumatology
- Pediatrics
- Gastroenterology
- Internal Medicine
- Rehabilitation medicine

IV. Application Process

- To view more details and to apply for any of the residency specialties mentioned above in point “III”, please refer to the link below:
<https://skanecare.com/training-programmes-3/medical-residency/training-positions/>

V. Following completion of the course

- It will be expected that following successful completion of the residency program, the successful candidate will take up a specialist clinical role within SKMCA within their chosen specialty.

For more information about the residency program, please contact the Director – Education, Training and Research at SKMCA on etr.department@skmca.ae.

VI. About Skåne Care

Skåne Care is the international gateway to the skills, services, and expertise offered by the public healthcare and dental care system of Region Skåne in Sweden’s southern province. World-renowned Skåne University Hospital in Lund and Malmö is the hub within our wide network of specialised hospitals in ten locations, with around 150 primary healthcare clinics managed or funded by Region Skåne. 30,000 healthcare professionals serve Skåne’s 1.4 million residents as well as national and international referrals. Medical research, training and education is performed in close cooperation with Lund University and Malmö University.
